

HPONE MARN

Full Stack Developer

PROFIL

Junior Developer with hands-on experience in both web-based and desktop ERP systems. At MIT Company , developed a gold shop ERP web app including inventory, sales, purchase, gold saving, pawn, audit, and customer management features — with strong emphasis on backend logic and database design. Earlier, created a clinic mini ERP (5 months) using Visual Basic. Skilled in database design, server-side module development, and complex business workflows. Looking for a challenging junior developer position where I can contribute and grow.

WORK EXPERIENCE

Full-Stack Developer

Myanmar Information Technology (MIT)
November 2025 - Present

- Backend-focused developer building a gold shop ERP web application using Java (Spring MVC) and MySQL.
- Designed and implemented server-side business logic for inventory management, sales tracking, purchase, gold saving, pawn, audit, and customer management modules.
- Developed RESTful APIs using Spring MVC to handle data exchange between backend and Angular frontend.
- Designed and implemented database schemas for product, transaction, user data, and gold saving/pawn records with optimized SQL queries and joins.
- Built reporting features on the server side including daily sales reports, profit/loss statements, and stock alerts.
- Collaborated with customer to gather requirements and deliver features that match real-world gold shop workflows.
- Performed debugging, testing, and deployment of the web application.
- Used GitLab for version control and team collaboration.

Junior Developer (Freelance)

သီတဂူ ဗုဒ္ဓ တက္ကသိုလ်၊ ကေတုမတီ
November 2025 - Present

- Developed a mini ERP system for an eye clinic using Visual Basic (VB.NET) .
- Built a local database (Microsoft Access / SQL Server) to store and retrieve patient data efficiently.
- Generated daily and monthly reports for clinic management.
- Provided user training and documentation for clinic staff.
